

Queanbeyan to Tralee

A safer way to walk, ride and connect

A proposed continuous off-road pedestrian and cycle trail linking local communities with places to work, explore and enjoy.

Route key

- - - - - Proposed Queanbeyan to Tralee urban rail trail
- Existing Queanbeyan River Trail
- - - - - Canberra Avenue cycleway
- . . - . Old Cooma Road cycleway to Googong
- - - - - On-road routes avoided by the proposed urban rail trail
- Trail Access Points

More connections

More possibilities

A direct route for everyday journeys

The proposed trail would connect residents of Tralee, Jerrabomberra, Googong, West Queanbeyan and Queanbeyan with employment hubs at Hume, West Queanbeyan, Queanbeyan CBD, Fyshwick and Canberra City.

It would offer a safer alternative to cycling on the shoulders of nearby major roads and connect with the extensive ACT cycle network, providing an alternative to the Monaro Highway.

01 A new use for an existing corridor

Adaptive reuse of a disused rail line would create space for walking and cycling, with potential benefits for community health, recreation, local commerce and tourism.

02 The Rail and River Route

By linking with existing off-road routes in Queanbeyan, the proposal would help create a 25 km pedestrian and cycle route around the city.

03 The first stage of a wider vision

The urban trail is proposed as Stage 1 of the Monaro Rail Trail, with an ultimate vision extending to Cooma, Nimmitabel and Bombala. The future trail beyond the urban section would focus largely on recreation and tourism.

04 Estimated annual trail use

An independent consultancy review estimated that 22,005 cyclists and 17,730 pedestrians annually will utilise the trail, growing annually.
