TOURISM AND TRANSPORT PLAN
Supporting the Visitor Economy
NSW Common Planning Assumptions

Common Planning Assumptions are used across agencies to ensure alignment and understanding of the relevant data, policies and assumptions to underpin planning decisions and policy analysis for government strategies and investment decisions. This supports consistency in the advice provided to Government and the community.

The Common Planning Assumptions represent a consistent baseline or a starting point, and are developed based on current and past trends and agreed policies and plans. They are not targets or scenarios.

This strategy and supporting analysis are based on the agreed Common Planning Assumptions as at March 2018.

Details of the Common Planning Assumptions used are set out in the Common Planning Assumptions Book version 3.1

Ministers’ Message

Tourism contributed $34.2 billion to the New South Wales (NSW) Gross State Product in 2016-17\(^1\) and employed 262,000 people – one in every 15 jobs in the state. Tourism is especially important to the regional NSW economy. In 2017, 65 per cent of state-wide overnight stays and day trips were in regional NSW, generating $16 billion in visitor expenditure\(^2\).

We value visitors to NSW as important transport customers.

From vibrant and friendly cities and towns, to the rich history and natural wonder of the regions, NSW is a huge drawcard for domestic and overseas visitors. Our State capital, Sydney is the main international gateway for visitors to Australia and doubles as a leading location for business and major attractions of sport, festivals and entertainment.

Regional NSW, from its outstanding food and wine regions to its pristine beaches and World Heritage listed, awe-inspiring landscapes, is a diverse patchwork of exploration and relaxation possibilities for visitors of any age from around the world.

Whether visitors come from within NSW, interstate or overseas, transport plays a vital role in their experience.

In 2017, our transport network carried more than 35.7 million overnight visitors around NSW, connecting them to unique destinations and experiences across our beautiful state.

The NSW Government has committed to a goal of more than tripling 2009 overnight visitor expenditure by 2030, aiming to achieve $45 billion by 2025 and $55 billion by 2030. It has also committed to achieving $20 billion in regional overnight visitor expenditure by 2025 and $25 billion by 2030, in alignment with the overall 2030 target\(^3\).

\(^1\) Visitor Economy Industry Action Plan 2030
\(^2\) Visitor Economy Industry Action Plan 2030, Page 3
\(^3\) Visitor Economy Industry Action Plan 2030
The NSW Transport cluster of agencies is currently contributing to achieving this goal through:

› New ticketing products, improving options for visitors and encouraging them to travel by public transport across NSW – including the NSW TrainLink Discovery Pass, Opal ticketing and a Contactless Payment trial
› Wayfinding improvements, including public transport and roadside signposting across NSW
› New train, bus and ferry services in Sydney serving growing numbers of visitors to key destinations including the Blue Mountains, Bondi Beach and Darling Harbour
› Transport infrastructure upgrades enabling greater destination options across NSW, including along the Pacific Highway corridor, which has contributed to significant growth in national park visits.

This Tourism and Transport Plan, a commitment made by the NSW Government in 2015, supports the government’s tourism goals by outlining a visitor customer outcomes framework and initiatives to guide our work over the next decade.

Our visitors are important transport customers and this plan places their needs at the centre – addressing the entire visitor experience from planning trips to arrival, enjoying our wonderful destinations and sharing the journey with friends and family.

The Hon Andrew Constance MP
Minister for Transport and Infrastructure

The Hon Melinda Pavey MP
Minister for Roads, Maritime and Freight
Executive Summary

More people visit NSW than any other state or territory in Australia. Visitors are increasingly seeking opportunities to experience NSW’s unique Aboriginal culture and history, while regional NSW hosts multiple festivals and events. No other Australian state offers outback, country, alpine, coastal, and subtropical regions all within its borders. Cruise ship visits to regional NSW are growing, supported by related investment in the ports of Newcastle and Eden, leading to higher revenue and increased passenger and crew days.

Transport has the potential to support and enhance existing tourism as well as create new economic development opportunities. In recognition of the critical interconnect between transport and tourism in regional NSW, a supporting Tourism and Transport Plan has been developed as part of Future Transport 2056.

This plan provides a framework of customer outcomes for our visitors and initiatives to guide the work of the NSW Transport cluster over the next 10 years. These customer outcomes and initiatives are designed to harness emerging technology and service models as well as visitor trends. These demonstrate the role that the NSW Transport cluster will play in realising the NSW Government wide Visitor Economy 2030 State-wide and regional targets committed in the Visitor Economy Industry Action Plan. Customer outcomes and initiatives for investigation include:

Customer Outcome 1: Enhancing the visitor experience

- Helping visitors plan their visit:
  - Improved visitor information and regional promotion including through marketing on Transport services
  - Improved online booking and packaging of regional services
  - Using technology to help visitors safely plan their journey on regional roads.

- Improved travel experiences to and from destinations:
  - Further roll-out of contactless payment technology and improvements to customer information around ticketing for visitors
  - Improved wayfinding for visitors, including increased use of digital platforms
  - Better facilities at transport interchanges across the state
  - Improved in-vehicle experiences with fleet upgrades.

- Experiencing destinations:
  - Development of place plans and integration of the Movement and Place framework to improve places on Transport owned assets that people visit
• Significant upgrades across our networks through our multimillion dollar Transport Accessibility Program to provide increased accessibility for visitors with disabilities
• Improved amenities and customer service on visitor routes.

Sharing the journey:
• Extending WiFi availability and phone/device recharge points across more services and interchanges
• Responding to customer feedback.

Customer Outcome 2: Greater access to more of NSW

Improved connections to our global gateways:
• Improved road, bus, train, walking and cycling connections to Sydney Kingsford Smith Airport in collaboration with Sydney Airport
• Design and business case for the North South Rail Link to Western Sydney Airport as part of the Western Sydney City Deal
• Investigate options to provide better connections to the Gold Coast Airport, Canberra Airport and Newcastle Airport
• Investigate Transport cluster related actions arising from the Cruise Development Plan.

Connecting visitors to the regions:
• Improved quality and availability of rest areas for tourists in regional areas including accessible facilities
• First and last mile road network improvements for regional visitor destinations
• Investigate economic opportunities of electric vehicles at tourism destinations and for the regional touring economy
• Main/High street improvements in regional towns
• Support Destination NSW to prepare a Tourist Drive strategy and supporting marketing campaign to increase regional overnight visitors and expenditure
• Evaluate outcomes of bypassed towns signage pilot and roll out to further bypassed towns if shown to be successful
• Work with Destination NSW to streamline the signposting application process and enhance tourist drive signposting in regional NSW
• Roll out of the hub-and-spoke model for regional transport services
• Improved links to national parks and nature based tourism
• Improved access to our Aboriginal and heritage precincts and attractions.
Improved services:

- Boost services to regional tourism destinations in line with the hub-and-spoke model
- Extend public transport services to support the night-time economy.

Customer Outcome 3: Making transport the attraction

Creating places with our transport assets:

- Re-purpose regional train stations and rail assets that are not being used for transport in ways that contribute to great places (e.g. for heritage/food and coffee/entertainment tourism/rail trails).

Growing transport as tourism:

- Supporting tourist and heritage trains
- Roll out the cycling towns program and consider the conversion of more rail trails to support regional bicycle and active tourism, where there is community support
- Investigate cross-government opportunities for a more strategic approach to maritime infrastructure investment.

Customer Outcome 4: A seamless experience

Packaging experiences:

- Use emerging ‘Mobility as a Service’ models to package transport and destination products.

Servicing events, festivals and peak holiday times:

- Work with Destination NSW and event organisers to provide transport services for events and at peak visitor times.

Integrating tourism into transport planning:

- Coordinate with partners in the tourism and transport industry, local government and NSW Government agencies as we plan, deliver and manage transport infrastructure and services.

Collaboration and partnerships:

- Build new collaborative partnerships with customers, the community and industry as we continue to improve the way we deliver the infrastructure and services to support the visitor economy.
Chapter 1: Introduction
Future Transport 2056 comprises an overarching strategy and a suite of supporting plans. It is an update of NSW’s *Long Term Transport Master Plan* released in 2012. It has been developed in concert with the Greater Sydney Commission’s *A Metropolis of Three Cities*, Infrastructure NSW’s State Infrastructure Strategy, and the Department of Planning and Environment’s Regional Plans, to provide an integrated vision for the state.

The *Tourism and Transport Plan* is a key Supporting Plan in the Future Transport 2056 suite, and is aligned with the Regional NSW Services and Infrastructure Plan, the Greater Sydney Services and Infrastructure Plan and the NSW Freight and Ports Plan. The Tourism and Transport Plan focuses on what the Transport cluster of agencies can do to deliver on the NSW Government’s state-wide targets for the visitor economy set in the *Visitor Economy Industry Action Plan 2030*. It was developed in collaboration with the tourism sector and will inform the state-wide Tourism Infrastructure Strategy.

![Figure 1: Overview of Future Transport 2056](image-url)
Future Transport Strategy

The Future Transport Strategy is a vision for how transport can support growth and the economy of New South Wales over the next 40 years. It provides a framework for network planning and investment aimed at harnessing rapid change and innovation to support a modern, innovative transport system that serves the community and economy well into the 21st century.

Visitor Economy Industry Action Plan 2030

In 2012, the NSW Government established the Visitor Economy Industry Action Plan (VEIAP) and set the ambitious target to double overnight visitor expenditure to $36.6 billion by 2020. This included actions for the NSW Transport cluster which were incorporated into the 2012 NSW Long Term Transport Master Plan and are underway or completed.

In September 2017, the NSW Minister for Tourism and Major Events launched a mid-term review of the 2012 VEIAP. This review has culminated in the Visitor Economy Industry Action Plan 2030 which updates and extends the 2012 plan and targets.

The Visitor Economy Industry Action Plan 2030 sets targets for NSW to:

- more than triple 2009 overnight visitor expenditure to 2030, aiming to achieve $45 billion by 2025 and $55 billion by 2030, and
- achieve $20 billion in regional overnight visitor expenditure by 2025 and $25 billion by 2030, in alignment with the overall 2030 target.

To help drive growth in the Sydney and regional visitor economies, the Visitor Economy Industry Action Plan 2030 sets a direction for the NSW Government to invest in new ways to support the visitor economy through:

- a new Team Tourism NSW Taskforce of industry leaders to improve visitor economy collaboration
- increased funding and accountability for the Destination Networks
- the development and release of a state-wide Destination Management Plan, nature based tourism strategy and tourism infrastructure strategy
- a new industry portal, and
- a new Visitor Economy Index designed to complement the expenditure targets by tracking industry conditions, perceptions and the future industry outlook over time.

The role of transport in the visitor economy

Customers from overseas, interstate and visiting from elsewhere in NSW expect transport services that are accessible, comfortable, easy to use and connected to destinations. This plan focuses on how transport policy, assets and services can support the visitor economy in NSW.
Visitor economy customer outcomes

Four customer outcomes were co-developed with the NSW Tourism and Transport sector that align with the Future Transport 2056 customer outcomes. These outcomes are designed to guide the work of the NSW Transport cluster of agencies over the next decade as we refine, develop and deliver policy, services and infrastructure.

1. **Enhancing the visitor experience**

Meeting the transport needs of customers visiting our cities and regions means ensuring services are accessible, comfortable, easy to use and suitable for people travelling in groups, carrying luggage and travelling outside of peak hours and weekends to popular visitor destinations.

New technologies will make planning, booking and paying for travel and wayfinding on transport services easier.

2. **Greater access to more of NSW**

Transport is essential in connecting visitors to our cities and regions. By improving existing connections and expanding connections to new destinations, transport can create new visitor experiences across the state and support new industries and employment in regional communities.

3. **Making transport the attraction**

Transport not only gets visitors to destinations, but can also be an attraction in itself. Heritage tours, walking and cycling trails, and iconic journeys by road, rail and sea all contribute to attracting visitors to NSW.

4. **A seamless experience**

When visiting NSW, our customers use a variety of both public and privately operated services to reach and explore their destinations. Seamless connections between airports, cruise ship terminals, mass transit services, on-demand services and car and bike rentals will enhance the experience for visitors. This experience is enabled by planning and coordination with private operators and across government within NSW and interstate.
What Transport can do

There are five key areas of focus where the NSW Transport cluster of agencies can support the visitor economy in NSW:

› Ticketing
› Information
› Services
› Infrastructure
› Planning and coordination of transport.

There are initiatives the NSW Transport cluster of agencies is undertaking under each of these categories and new initiatives identified for further investigation.

The initiatives identified for investigation in this Plan aim to support the unique tourism opportunities in each region and will help implement Destination Management Plans that have been developed by the six Destination Networks across NSW.
Customer and stakeholder engagement in developing this Plan

There has been extensive engagement with customers and stakeholders in the development of this plan as part of a wider consultation process for Future Transport 2056. A draft Tourism and Transport Plan was released in October 2017 along with the draft Future Transport Strategy and Greater Sydney and Regional NSW Services and Infrastructure Plans.

Council and industry workshops and public information stalls were held in 30 locations around the state between November 2016 and December 2017. Customers were invited to provide input and feedback via the Future Transport 2056 website as short comments or through more formal written submissions on the draft plan.

We received submissions from local councils, industry bodies, community groups, other government agencies, and members of the public. Overall, our engagement campaign for the draft plan provided 75 formal submissions and 77 website comments from individual members of the public.

Formal submission were received from:

 › 50 individuals, including small business owners
 › 13 local councils (10 from regional NSW)
 › 7 private enterprises
 › 7 advocacy and community groups and academics.

In reviewing the comments and submissions we have heard how important tourism is for the development of our regional communities and have refined the plan to better prioritise connecting visitors to the many and varied destinations in regional NSW.

We heard more needs to be done to attract and cater for visitors to inland rural and regional NSW by creating better connections across the Great Dividing Range to the west and upgrades to major roads infrastructure, such as upgrades to the Newel Highway, as well as more rest stops and signage.

We have also heard from regional coastal centres of the opportunity enabled by the growing cruise ship industry with upgrades to ports and terminals and connections to regional visitor sites and venues.

We have refined this plan based on the feedback to improve the way the transport system supports the visitor economy across the state. The extensive list of initiatives set out in the Greater Sydney and Regional NSW Service and Infrastructure Plans will address many of the concerns raised in the submissions for infrastructure upgrades. The other initiatives that are included in this Plan address the concerns raised that specifically relate to our four visitor economy customer outcomes.
Chapter 2: State of Tourism in NSW
NSW is a State that is not only Australia’s international gateway, but a nationally and internationally recognised destination for visitors, hosting some 35.8 million overnight visitors in the year ending December 2017. Whether these visitors are drawn to NSW for business, holidays, family or as part of a wider Australian visit, they form part of the State’s visitor economy.

**Value of tourism in NSW**

Tourism contributed $34.2 billion Gross State Product to the NSW economy in 2016-17. There has been a 50.4 per cent growth in the sector since March 2011. This represents a significant economic benefit across Sydney and regional NSW.

We know Sydney is experiencing room occupancy rates of 87.9%, compared with regional NSW at 67.3%. This means regional NSW presents an enormous opportunity to disperse visitor nights and expenditure and optimise visitor economy growth across the State.

In December 2017, annual NSW takings from accommodation were the highest on record, increasing 8.4% to $1.4 billion, mainly due to revenue growth of 10.3% in regional NSW and 8.4% in Sydney.

In addition, Tourism Research Australia highlighted that in 2016-17, 43 cents of every tourist dollar went to regional Australia. Many regional economies are influenced by visitation and tourism, with regional visitor expenditure heavily concentrated on a few activities. NSW makes up 30 per cent of Australia's total tourism consumption with an estimated $40.5 billion of tourism related products consumed in NSW in 2016-17.

---

1. Tourist Accommodation Snapshot – December Quarter 2017. Source Destination NSW
3. State Tourism Satellite Accounts 2016-17 and Tourism Businesses in Australia as at June 2017, Tourism Research Australia
Overnight visitors to NSW have increased 5.2 per cent with spending up 6.8 per cent. International visitors make up almost half (48 per cent) of overnight stays in NSW. Our transport services need to meet the needs of our culturally and linguistically diverse visitors. Visitors from non-English speaking countries now outnumber visitors from English speaking countries. In the year to January 2017, NSW welcomed 3.1 million international short-term visitors.
The recently endorsed Visitor Economy Industry Action Plan 2030 identifies the NSW visitor economy as being stronger than ever. NSW is the number one state in terms of visitor nights, numbers and expenditure. In calendar year ending December 2017, overnight visitor expenditure in NSW reached an impressive $29.1 billion. VEIAP 2030 details 43 actions under six focus areas to build on this success, and to reach ambitious new visitor economy targets.

### Employment

The tourism sector employed 262,000 people in NSW in 2017 (directly and indirectly). This is equivalent to one in 15 jobs. Direct jobs include those in hospitality, travel agencies and tour operation. Encouraging the tourism sector to procure locally produced goods and services will maximise the economic impact of tourism revenue in regions and can lead to further indirect job growth.

### Why people visit NSW

Visitors to NSW can be segmented in multiple ways including area of interest, demographics and purpose of trip; from business to backpackers, international students and caravan and camping travellers. Destination NSW regularly produces profiles on different segments that exist in the NSW visitor economy. Transport enables each of these in different ways. Some examples of how transport needs vary for different segments are provided below.

### Visiting Friends and Relatives

Visiting Friends and Relatives accounts for more than a third of international and domestic overnight visitors to NSW. Hosts are highly likely to accompany visitors to activities and attractions, especially international visitors. Visitors staying with friends and relatives look for local experiences and typically use local public transport and self-drive options to get to destinations.
Aboriginal Tourism

NSW has the largest Aboriginal population in Australia, and is an ideal location for international and domestic visitors to learn and engage with the world’s oldest culture. ‘Aircraft’ (29.3%) was the most common transport mode used by international visitors who participated in Aboriginal tourism in NSW in 2017. ‘Private vehicle or company car’ (25.6%) was the second most common, followed by ‘local public transport’ (10.5%).

Food and Wine Tourism

Food and wine experiences have become key drivers of destination choice amongst many domestic and international visitors. Many regions in NSW and the rest of Australia feature food and wine experiences as core tourism products that are integral to the success of the local tourism industry.

NSW received nearly five million food travellers who stayed for nearly 59.4 million nights in the State. Food travellers spent an estimated $8.5 billion in the NSW. ‘Private vehicle or company car’ (28.9%) was the most common transport used by international food travellers, followed by ‘aircraft’ (27.9%) and ‘taxi or chauffeur driven hire car’ (22.6%).

Nature-based Tourism

Nature-based tourism includes outdoor and nature experiences and is one of the main reasons people visit regional NSW. Forty-five per cent of overnight visitors to regional NSW participate in a nature tourism experience. In 2017, visitors who took part in a nature-based activity stayed 48.8 million nights in regional NSW, spending $8.2 billion.

Cultural and Heritage Tourism

NSW received 12.3 million international and domestic cultural and heritage visitors in 2016, spending an estimated $12 billion, an increase of 7.6 per cent on 2015. The value of cultural tourism is expected to increase further through the rollout of the $100 million Regional Cultural Fund and with cultural infrastructure earmarked as part of the Cultural Infrastructure Plan 2025+

Accessible Tourism

Accessible tourism is about making it easy for all people to enjoy tourism experiences. This includes: older people, those with a disability, people from non-English speaking backgrounds and people travelling with children.

In the first quarter of 2017, 1.2 million people with disabilities or long term health conditions travelled domestically to stay overnight in NSW. Around a quarter came from Sydney (24%), followed by the South Coast (8.5%), Central Coast (8%) and the Hunter (7.5%). From interstate, Queensland and Victoria were top source markets (at 12.5% and 11%, respectively).

‘Private vehicle or company car’ (80%) was the most popular form of transport used by domestic visitors with disabilities or long term health conditions, followed by ‘aircraft’ (11%) and ‘railway’ (6%).
Tourism in Sydney and regional NSW

In 2017 NSW received 93.7 million visitors, who stayed 194.5 million nights and spent $29.1 billion. Of those 64% visited Regional NSW and 36% Sydney.

Regional overnight stays in NSW

Source: National and International Visitor Surveys, for the 12 months ending December 2017. Tourism Research Australia
Sydney

Sydney is the number one capital city in Australia for visitors, nights and expenditure. Sydney received 3.9 million international overnight visitors who spent 79.7 million nights in Sydney in 2017. The highest numbers of visitors were from mainland China, who accounted for 19.5% of international visitors and stayed for 18.5 million nights, spending $3.1 billion in 2017.

‘Visiting friends and relatives’ (35%) was the main purpose of the visit for the largest proportion of domestic overnight visitors to Sydney, followed by ‘business’ (33%) and ‘holiday’ (24%).
Regional NSW

Regional NSW is vitally important to the visitor economy in NSW. Domestic and international visitors to NSW destinations outside Sydney generated 88.1 million nights of accommodation NSW and $16.3 billion in visitor (overnight and day trip) expenditure in 2017. ‘Holiday’ (46%) was the largest purpose of visit for overnight visitors to regional NSW, followed by ‘visiting friends and relatives’ (35%) and ‘business’ (13%). Regional NSW was the largest source of overnight visitors to Sydney (39%) and Sydney was the largest source of overnight visitors to regional NSW (36%). There is a great opportunity to grow the visitor numbers in regional NSW by showcasing the destinations and attractions on offer.

23.2 million
visitors to Regional NSW in 2017

37.7 million
domestic day trips to Regional NSW in 2017

Top reasons for trips to Regional NSW

- Holiday: 47%
- Visit friends/relatives: 35%
- Business: 14%

Figure 7: top reasons for overnight trips to Regional NSW

Source: National and International Visitor Surveys, for the 12 months ending December 2017, Tourism Research Australia
Visitor numbers vary across NSW. The North Coast is the most visited regional destination, followed by the Hunter and the South Coast. Day trips make up the largest portion of visitor numbers in each area apart from Outback NSW and the Snowy Mountains. More can be done to grow the share of international visitors to regional areas in NSW through services, infrastructure, information and development of products to enable increased regional dispersal.

Transport can play a major role in growing regional tourism, by providing new and more convenient ways to get to and travel around regional destinations and attractions. We can also showcase these destinations through advertising on the network and improving roadside signage.

Airports bring the largest number of international visitors to our shores, while road travel is the main way domestic visitors travel within NSW.
Chapter 3: Visitor economy customer outcomes
Customer Outcome 1: Enhancing the Visitor Experience

The transport needs of visitors and people who work in tourism differ from weekday commuters.

To create a world class travel experience for visitors, we need to consider the needs of customers who may be unfamiliar with the transport system and may be travelling at different times.

Meeting the transport needs of customers visiting our cities and regions means ensuring services are accessible, comfortable, easy to use and suitable for people travelling in groups, with disabilities, carrying luggage and travelling outside of peak hours and on weekends to popular visitor destinations.

When our customers visit NSW they experience our transport system at each stage of their journey. This includes planning their journey, travelling to and from their destination, experiencing the destination, and sharing their journey with others.

We can enhance the end-to-end visitor experience for visitors and enable visitors to move around the network seamlessly and enjoy transport connections to attractions and visitor precincts by:

› Improving the transport information available to visitors when they are planning their visit
› Improving access and travel for visitors, including people with disabilities, arriving and departing their NSW destination
› Creating places and experiences for visitors at their destination
› Providing opportunities for visitors to share their experience during and after their trip with WiFi access at key interchanges and on public transport and other ways to share their transport journeys on social media.

“Connected, integrated and active cities and regions are key to improving liveability for residents and creating destinations that are attractive to visitors” – Tourism and Transport Forum, 2017
PRE-JOURNEY
Planning
Ease of arranging and booking transport
The visitor experience starts before leaving home with arranging and booking the visit. The NSW Transport cluster has a key role in creating a positive pre-travel visitor experience with transport information and ticket booking services available before leaving home.

ARRIVE
Ease of getting around and to sites and attractions
Experiencing The Destination
The destination experience is often shaped by the ease of getting to and around the sites and attractions including for people with disabilities. Creating attractive and vibrant places that are well connected to the transport network will also help boost tourism. A recent example is Circular Quay where Government investment to upgrade the ferry wharves will unlock private capital for a whole of precinct renewal including retail, dining and entertainment attractions as well as a modern transport interchange.
ACCESS AND TRAVEL

Travelling To and From
Quality and integration of transport

The visitor experience continues with travelling to and from the destination. This is shaped by the quality and integration of the transport services and infrastructure. Connecting transport modes seamlessly enriches the tourism experience. In future, visitors will increasingly expect seamless connections between tourism gateways like cruise ship ports and airports and destinations.

POST-JOURNEY

Sharing
Sharing the experience with friends and family

Sharing the journey with friends and family is the final part of the visitor experience and is key to supporting the visitor economy. We can provide opportunities for visitors to share their experiences during and after their trips.
Helping people plan their visit

Our customers tell us that clear and effective communication of road conditions, timetable and service disruption information is very important. To continually improve our performance in this area we are implementing a range of initiatives designed to make it easier for customers to access the information they need, wherever they are, and whenever they need it.

Visitor information and regional promotion

Information about transport services presents opportunities to promote regional destinations.

Personalising transport services to cater for the needs of our visitors means providing service planning information and wayfinding signage in accessible formats that can be easily understood or translated using new mobile technology for people whose first language is not English, and helpful advice for making connections easier and journeys more enjoyable.

The widespread use of smart phone technologies to plan, book and pay for transport services will be enhanced by new apps that provide real time alerts on service changes. Videos demonstrating how to use these apps and the travel planning toolkit are available on the transportnsw.info website in a range of languages.

The Transport for NSW travel planning website transportnsw.info is one of the most visited websites in Australia. The site includes information on all regional services and promotes events and destinations within NSW with packages that include travel as part of entry fees for many major events.

Figure 10: Promoting regional destinations on the Transportnsw.info website
Promoting the ‘Next trip’ on board

Planning the next visit in NSW can start on board a public transport service. Transport for NSW has partnered with Destination NSW to promote regional events and destinations on board our trains, ferries and bus services and at transport interchanges.

We could extend this partnership in promotion of regional destinations and events by considering the potential for a regular digital or printed “on-board magazine” to promote destinations, events and experiences, similar to those available on international and domestic flights.

Planning a journey on Regional roads

Self-drive tourism is a popular way for visitors to see NSW. Visitors often do not realise the distances involved in travelling between regional destinations when they first start planning their trip. As visitors are planning more of their journeys online, we are adapting the channels through which we provide information to make it more relevant and available to visitors.

Roads and Maritime Services has collaborated with Destination NSW to establish a series of drives and road trips on the visitnsw.com website with information and promotion to help visitors plan their trips. Complementing this is an online rest areas and Driver Reviver interactive map on the Roads and Maritime website to help visitors plan for rest stops along the way. The map works across all devices – mobile, tablet and desktop. It can be used to find the nearest rest area or Driver Reviver location during holiday periods, or to find a rest area with specific amenities on a route.

Launch NSW Rest Areas and Driver Reviver map »

Figure 11: NSW Rest areas and Driver Reviver map
To progress the commitment made in the Visitor Economy Industry Action Plan 2030, Roads and Maritime Services will collaborate with Destination NSW to prepare a tourist drive strategy and supporting marketing campaign to increase regional overnight visitors and expenditure and encourage regional dispersal.

7 Visitor Economy Industry Action Plan 2030, Page 14
Improving travel experiences to and from destinations

We continuously strive to make travel experiences better for visitors to NSW. We regularly receive and act on feedback from customers using our system. Visitors provide us with valuable feedback about what matters most to them, including the comfort of our services, timeliness, safety and security, and convenience. We can improve the travel experience for visitors travelling to and from their destination by improving ticketing, wayfinding and in-vehicle experience.

Ticketing

New contactless payments and ticketing options will make using public transport easier for visitors.

The number of active Opal cards has remained relatively stable since 2015 but the number of cards issued continues to rise. By December 2016, more than 11 million cards had been issued, suggesting many cards are being purchased for use by visitors during their stay.

We have a holistic approach to improving Opal for visitors that includes improvements to technology and infrastructure, on-mode communications, marketing, wayfinding, and communication and training of staff. As we move to new payment and ticketing models, we can continue to update and improve the ticketing information we provide to visitors arriving in NSW including at key entry points like airports, cruise terminals and major transport interchanges.
Opal contactless payments trial

Transport for NSW is planning to roll out integrated ticketing across regional NSW so locals and regional visitors have the same convenient experience across the State. Looking further ahead our vision is for a seamless customer experience across modes and borders by 2056. This will mean multiple tickets and different concession entitlements will be a thing of the past.

Currently we are trialling new ways customers can pay for their travel such as contactless payments on Sydney Ferries and light rail. These payment systems are already available in places like London, while Singapore is due to roll out contactless payments via wearable technology such as smart watches.

Customers can now use their payment card or mobile device linked to a contactless payment account to pay for an adult single trip on the light rail and Sydney Ferries networks. Customers can tap on and tap off at an Opal card reader to pay their fare using most American Express, Mastercard and Visa cards, plus mobile wallets on smartphones, tablets and watches.

The trial includes services that run to 57 locations across Sydney, including popular visitor destinations like Manly, Darling Harbour, Barangaroo, the International Convention Centre, The Star Sydney and Sydney Fish Markets. This reduces barriers for visitors catching public transport during their stay by reducing the need to buy an Opal card for trips on these services.

Wayfinding

New technologies make wayfinding easier anywhere, anytime.

Finding your way around Sydney or regional NSW has never been easier with multiple smart phone apps for navigating the system. Transport for NSW has been collaborating with app developers over the past five years to produce a range of trip planning and wayfinding apps. We supply real-time data to apps with over five million unique customer downloads. The Transport for NSW Open Data Hub makes these datasets, along with other transport data, more broadly available.

Visitors can use these technologies to find their way on the system and locate connecting services. These technologies are enabled by smart device charging points and WiFi at major interchanges and on services.
Personised digital transport assistant

Transport for NSW is developing a ‘Chat Bot’ called RITA (Real-time Intelligent Transport Assistant) which uses artificial intelligence technology to provide customers with personalised end-to-end travel assistance in NSW.

RITA can currently:

› answer over 300 frequently asked questions including 40 that cover regional NSW
› provide trip planning advice with geolocation
› give personalised disruption notifications, and
› accept customer feedback without the need to fill in complex forms.

Transport is working towards RITA having the ability to top up Opal tickets and request fare adjustments. Future improvements will allow RITA to incorporate ‘micro content’ messaging such as driver safety, driver reviver or providing information about destinations along the way while travelling.

RITA is available on the flagship transportnsw.info website; Facebook Messenger NSW Public Transport handle; and Google Assistant and Amazon Alexa voice activated digital assistants with potential to extend to other channels including Apple Siri and Mobile Applications such as Opal Travel.
A new signage system introduced in 2013 has made it easier for public transport customers to navigate their journeys and change between modes. The system, which is based on international best practice, reduces clutter for customers when they enter busy transport locations and provides uniform codes and colours to enable easier navigation. It is now well established across all modes. Transport for NSW is continually improving the use of digital information at stops and interchanges.

There is a growing number of international visitors to NSW who do not speak English as their first language. As international visitor markets change, so do the main languages spoken by visitors. We invest in fixed wayfinding signage on our system, to last decades. It is difficult to anticipate and provide for the changing language needs of visitors with fixed signage. For example, 20 years ago Japanese was the most commonly spoken language at many visitor destinations. China has recently become the origin of most international visitors to NSW. A solution is to provide simplified language on fixed signage and public address announcements while developing more tailored and flexible digital wayfinding products. Additionally, technologies like Google translate are making it easier to translate signs and information on the go.

Transport for NSW trialled a touch-screen interactive kiosk at Circular Quay to answer simple public transport questions in five languages. A digital platform such as this has the potential to provide multi-lingual assistance and overcome a potential barrier to overseas visitors confidently using public transport.
Road signposting to visitor destinations is also due to be improved with implementation of the Visitor Economy Industry Action Plan 2030, which outlines actions for Roads and Maritime Services and Destination NSW to work together to streamline the signposting application process to enhance tourist drive signposting in regional NSW.

Experiencing transport hubs

Our transport hubs operate as gateways for visitors using our transport system. We are investing in our transport interchanges to improve the experience for all of our customers including visitors. Careful attention is being paid to enhance visitor experiences at key destinations such as Circular Quay and Central Station through the establishment of customer focused design principles.

Establishing customer focused design principles for Circular Quay and Central Station

Transport for NSW is taking a customer-led approach to the renewal of the Circular Quay and Central Station precincts. Extensive customer research has been the key driver in the development of design principles that encompass customer needs and aspirations for the precincts. These design principles will form a key part of the brief provided to future developers of these precincts and will be used by Transport for NSW to assess whether customer needs have been met in the new designs. Our transport hubs need to address multiple, and sometimes conflicting, customer needs. For example, regular commuters and infrequent or first time visitors need different wayfinding assistance. The new design principles make the desired customer outcomes clear for all involved in the renewal of these iconic transport hubs.
In-vehicle experiences

Clearer and friendlier announcements on board our services are improving the in-vehicle experience for customers.

More air conditioned trains are being rolled out across the suburban train network with a further 24 being delivered under the *More Trains, More Services* program by 2019. These trains will improve customer comfort and accessibility with features that include:

› Improved air conditioning with advanced temperature control
› Improved accessibility including priority seating, wheelchair spaces and hearing loops
› High definition customer information screens to provide journey and safety information
› Improved interior LED lighting.
New intercity and regional trains

More than 500 new intercity train carriages will replace our older train carriages on services from Sydney to Canberra, Sydney to the Central Coast, Newcastle, the Blue Mountains and the Illawarra. The first of the 500 New Intercity Fleet (NIF) carriages are to be delivered in 2019.

In addition to the NIF, the entire regional train fleet will be replaced to deliver unprecedented levels of comfort and service for regional rail customers. This includes 60 XPT passenger cars, 23 XPLORER and 28 Endeavour passenger cars for services between Sydney, Canberra, Melbourne, Brisbane and major NSW regional centres. The new trains will come into service progressively, with the first trains anticipated to be delivered in the early 2020s.

A new train could provide lots of benefits, such as:

› Safe, reliable, comfortable and accessible regional trains
› Ability to leverage innovative technologies for customers and fleet operations
› A more reliable service for customers travelling long distances
› Compliance with disability access requirements
› Opportunities for new servicing patterns for regional cities and centres, including day return travel to support a hub and spoke model
› Stimulation of the regional economy and provision of long term, sustainable jobs including traineeships and apprenticeships to assist with the maintenance of these new trains in regional NSW.

Experiencing destinations

Transport plays a significant role in a visitor’s experience of destinations across NSW. Much of the public space at destinations is used for transport, which can either enhance or detract from the experience. The accessibility of a place helps to make it successful.

Creating places

The Future Transport 2056 Service and Infrastructure Plans establish a ‘movement and place’ framework to manage and plan our road network in NSW. There is now recognition of the important role our roads play in creating successful public places.

There are some great examples of places we have created on our streets that have become go-to places for visitors. The vibrant main streets in regional centres like Armidale, Tamworth and Maitland are attractions for visitors in their own right. The Newcastle, Sydney and Parramatta city centres are undergoing revitalisation with light rail and streetscape improvements, making them even more attractive for visitors. The development of Place Plans in collaboration with stakeholders will ensure transport investment improves their design and function.

Transport for NSW is using its assets to connect people to places and point the way to visitor destinations in places that are accessible by public transport.

“If it’s a great place to live, it’s a great place to visit.”
- Tourism and Transport Forum, 2017
Showing how to get to destinations from Transport interchanges

Transport for NSW has worked with agencies such as Destination NSW and Central Coast Council to develop information that helps people navigate their way to common destinations from key train stations and other public transport hubs.
Facilitating Accessible Tourism

Accessible tourism in NSW is valued at around $8 billion per year and is growing. Twenty percent of the population have a disability and of these people, 88 percent take a holiday each year.

Around one third (29 percent) of visitors to Sydney are aged 55 years and over, and closer to two thirds travel in groups of two or more people. These volumes add to the importance of ensuring services are flexible and fully accessible. The proportion of older people and people travelling in groups is even higher in regional NSW.

The Transport cluster of agencies has an important role to play in facilitating accessible tourism. This includes the way information, services and assets are designed for people of all abilities to access. The Transport cluster will continue this work including through sensitive upgrades to heritage listed train stations and transport infrastructure.

Accessible tourism will be a focus of the state-wide Destination Management Plan.

“Visitors with disabilities are usually accompanied by carers, friends and family, which makes inclusive tourism a huge section of the travel market.” - Local Government NSW President Councillor Keith Rhoades
Transport Access Program

The Transport Access Program is an initiative to provide a better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure across NSW.

The program is providing:

› Stations that are accessible to people with luggage, a disability, limited mobility and parents with prams
› Modern buildings and facilities for all modes that meet the needs of a growing population
› Modern interchanges that support an integrated network and allow seamless transfers between all modes for all customers.

Since its launch in 2011, this Government has invested more than $1 billion in the Transport Access Program. This has delivered accessibility upgrades at an extra 45 stations and 15 ferry wharves improving our compliance with disability access standards.
Customer service on visitor routes

Customer satisfaction on trains, ferries and light rail are at record levels thanks to a significant focus on customer service.

We are improving accessibility to information at key visitor hubs across the public transport network. Staff training, friendly announcements and responding to customer feedback have all helped to improve customer service for visitors. Recent upgrades to the Transport Customer Service Centres at Circular Quay and Central Station have improved the visitor experience at these key visitor gateways to our public transport network. Emerging augmented reality technology will give customers more tailored information anywhere they travel on our road or public transport networks.

There is more we can do to improve amenities and services at prime visitor locations as we progressively upgrade our transport interchanges. New regional and intercity trains will provide improved amenity for visitors travelling to regional areas, enabling a new level of service for these customers.

Sharing the journey

Sharing the journey with friends and family is the final part of the visitor experience and is key to supporting the visitor economy. Transport can provide opportunities for visitors to share their experiences during and after their trips.

Making transport moments shareable

Great customer service makes transport experiences memorable. We want to create moments for visitors that will be shared with friends and family back home and on social media. Transport in NSW can be something that is talked about positively around the world.

Everyday visitors interact with Transport staff. Announcements on trains, coaches and buses or a friendly smile from interchange staff can all help to create a shareable moment. Staff can have fun personalising these interactions with helpful, informative and interesting advice to visitors.
Smart device charging points and WiFi availability in vehicles and at interchanges make it possible for visitors to share these moments instantly with their friends and family back home. Already visitors can access charging points at Central Station and on ferries. Visitors are sharing their journey on social media with WiFi available on Sydney Ferries, at Central Station and Circular Quay and being rolled out on select bus routes. New intercity and regional trains will also feature charging points.

Customer feedback

Every piece of feedback gives us a unique insight into the way our customers view our services. Our Transport operators work hard to get the essentials of their service right every day. However, we recognise that sometimes things go wrong. When that happens we want to hear about it and we want to make it as easy as possible for our customers to contact us and let us know.

To gain an insight into what our customers’ value, we have developed a Customer Satisfaction Index. This reflects the voices of over 17,000 customers. In listening to their feedback, we have achieved an average nine per cent annual increase in customer satisfaction with buses and trains.

Service innovation has played a key role in increasing customer satisfaction. The introduction of the Opal card significantly improved satisfaction levels by enabling greater convenience and ease of connection between modes. However, customers tell us that barriers to using public transport still exist in the areas of availability, frequency, reliability and areas serviced.

In the not too distant future, our smart phones will be the gateway for each journey and will enable transport providers to communicate directly with customers. These emerging technologies will better enable Transport for NSW to receive feedback in a greater number of ways. This information will enable service providers to know customer preferences and tailor service offerings in real time.

Customer Outcome 2: Greater access to more of NSW

Improving our global gateways

The number of international visitors to NSW is growing. Almost all of these visitors travel through one of our Global Gateway Cities. These Cities include Greater Sydney, Canberra and the Gold Coast/Tweed. They provide state level services and facilities to support a broad population catchment, while also having international connections through their airports and/or ports.

Existing Global Gateway airports at Sydney’s Kingsford Smith Airport, Canberra Airport, Gold Coast Airport, Brisbane Airport, Adelaide Airport and Melbourne Airport currently provide national and international connectivity for NSW. The NSW Government has contributed to Newcastle Airport’s investment in the facilities required to accept future international flights. The addition of the new Western Sydney Airport (WSA) at Badgerys Creek in 2026 to the NSW air network will provide a new full service domestic and international airport to meet growing visitor numbers and provide a new gateway to Greater Sydney’s Western Parkland City and the Blue Mountains. The NSW Government will continue to advocate for arrangements which are beneficial for regional air services during the development of the WSA.
Sydney Airport remains Australia’s number one international gateway.

Transport service and infrastructure improvements are easing access to this key international gateway. The NSW Government is upgrading roads around Sydney’s Kingsford Smith Airport to help improve traffic flow around the airport and Port Botany. The upgrades will also complement Sydney Airport’s upgrades to the internal road network. Improvements to public transport, walking and cycling connections will also improve access for staff and visitors alike.

The current Sydney Airport Master Plan includes a new Ground Transport interchange in the domestic terminal precinct to better facilitate bus, coach, walking and cycling connections. The NSW Government is working with Sydney Airport as it updates the Master Plan and we jointly prepare plans to better facilitate ground transport movements to and around the Airport.
Western Sydney Airport is under construction at Badgerys Creek, south west of Liverpool. The Airport will position Western Sydney as a true interstate and international destination and is providing a catalyst for a new aerotropolis city in Western Sydney attracting aviation related business by providing a gateway to the parklands, sporting and cultural facilities that Western Sydney has on offer as well as the world heritage listed Blue Mountains. Ground transport connections to Western Sydney will be critical in unlocking the potential of this once-in-a-generation investment the Western Sydney Aerotropolis.

The Airport will initially have a single 3.7 kilometre runway and will be a full-service airport capable of handling the full range of international, domestic and freight aircraft. Western Sydney Airport will be developed in stages and expand to cater for the growing Western Sydney economy and population.

Around five million people are expected to use the airport in its first year of operation. This is about the same number of annual passengers currently using the Gold Coast Airport. Based on growth projections, Western Sydney Airport will cater to about 37 million annual passengers by around 2050, almost the same number of annual passengers currently using Sydney’s Kingsford Smith Airport. In the long term, Western Sydney Airport could cater for approximately 80 million passengers per year.

Western Sydney Airport will drive tourism by:

- Adding additional capacity in the Sydney basin to grow international and domestic tourism markets
- Broadening the options within the Sydney basin for air travel
- Stimulating local nature, sport and event-based tourism and infrastructure, including additional accommodation capacity in Western Sydney and the Blue Mountains.
Western Sydney City Deal will improve connections for visitors

The Australian and NSW governments, together with eight local government areas in Western Sydney, signed the Western Sydney City Deal on 4 March 2018.

The City Deal is a 20 year agreement between the three levels of government to deliver a once-in-a-generation transformation of Sydney’s outer west – creating the ‘Western Parkland City’.

A centrepiece commitment from the Australian and NSW governments is to deliver the first stage of the North South Rail Link from St Marys to Badgerys Creek Aerotropolis via Western Sydney Airport, with a joint objective of having rail connected to the Western Sydney Airport in time for its opening.

Work will immediately commence on a thorough design and investment case for the North South Rail Link as part of an integrated planning and city-shaping approach.

Other international capable airports

There is more we can do to improve links to other international capable airports that serve visitor destinations across NSW. This includes the Gold Coast, Canberra and Newcastle airports.

The Gold Coast Airport is a key international hub and provides visitors with direct access to many attractions on the NSW north coast. The NSW Government is preparing a Tweed Transport Network Plan (TTNP) that will determine the medium to long term staging plan for transport improvements in Tweed, including improved connections to the Gold Coast Airport. The TTNP is being prepared with the involvement of the Queensland Government and local councils. It will identify capital investment options (including potential light rail extensions) and other actions to improve cross state border public transport links.

Canberra Airport has commenced international services and will play an increasing role in serving international visitors to the Canberra region. The NSW Government’s South East and Tablelands Regional Plan 2036 estimates that by 2033, Canberra Airport will service one million international passengers per year, with an average of six international return flights per day and 4,431 international aircraft movements per year.

Newcastle Airport has recently completed upgrades enabling it to accept international flights. This was made possible with $855,000 from the NSW Government’s Regional Tourism Infrastructure Fund. Planned improvements to transport connections around Newcastle Airport will allow better access for future international visitors.
Cruise ships

The cruise industry is a fast growing sector of the economy. Cruise ships are getting larger and calls are more frequent.

The 2017 cruise season was the biggest ever in NSW. We welcomed 1.53 million passengers through our cruise terminals, with Sydney Harbour hosting 367 ship visit days by 50 different ships, including 10 maiden voyages. In 2017-18, 360 cruise ships are scheduled to visit Sydney, including eight maiden voyages. In 2016–17, international travellers on cruise ships spent more than 74,000 days in Australian ports, contributing 21,260 new jobs and $5.3 billion to the Australian economy.

Figure 22: Cruise ship visits to NSW
The opening of the Barangaroo Ferry Hub and Wynyard Walk has made ferry access to White Bay Cruise Terminal easier. We will expand the Eden wharf to accommodate larger cruise vessels. We will manage and facilitate the growth of the cruise industry by implementing a Cruise Development Plan based on the findings of the Cruise Industry Reference Group.

As well as Sydney, cruise ship visits are growing at the ports of Newcastle and Eden, supported by related investment leading to higher revenue and increased passenger and crew days. For example, the current value of cruising to the Hunter region has already been estimated at approximately $11 million per year and the NSW Government is contributing $12.9 million towards the construction of a Newcastle Cruise Terminal to enable further growth.

The NSW Government has also committed $32 million for the Eden Breakwater Wharf Extension Project. This will allow cruise ships to berth in Eden rather than relying on the current transfer of passengers via tender to the wharf.

The Cruise Development Plan includes actions to manage the cruise industry development in the short, medium and long term. At the same time, Transport for NSW will investigate options to facilitate better connections to cruise terminals.

Support Destination NSW and cross-Government efforts to support the growth of the cruise industry in key NSW regions and potential emerging destinations through:

- education and training programs to build the tourism industry capability to cater for cruise calls
- supporting locally run ambassador programs
- working with local government to explore ways to improve wayfinding at port facilities

Support Destination NSW and cross-Government efforts to build the profile and appeal of NSW as a leading cruise destination by reviewing funding options for a cooperative marketing fund that could be used for initiatives including:

- data collection, acquisition and analysis
- targeted trade (cruise industry) and consumer marketing programs in partnership with Destination NSW, regional destinations and the cruise industry
Connecting visitors to the regions

Regional NSW tourism has grown steadily in the last decade as visitors are drawn to our State’s diverse natural beauty, country hospitality and excellent food and wine. Rural and regional NSW welcomed 813,000 international visitors in the year to June 2017 for a total of 14.8 million nights and $1.1 billion of expenditure.

Regional NSW tourism expenditure was $16.3 billion in the twelve months to December 2017. The total number of visitors to regional NSW grew by 23 per cent from December 2010 to December 2017 or 3 per cent each year in compound annual growth terms. Rural and regional NSW welcomed 852,500 international visitors in the year to December 2017 for a total of 14.7 million nights and $1.04 billion of expenditure. By the end of 2020, it is projected that regional overnight visitor expenditure will reach $15.6 billion.10

More people visit NSW than any other state or territory in Australia. Visitors are increasingly seeking opportunities to experience NSW’s unique Aboriginal culture and history, while regional NSW hosts over 850 major sporting events. No other Australian state offers outback, country, alpine, coastal, and subtropical regions all within its borders. Cruise ship visits are growing, supported by related investment in the ports of Newcastle and Eden, leading to higher revenue and increased passenger and crew days.

We are re-thinking the way we plan and service regional destinations.

Previous regional planning has focused on the connections of regional centres and cities to Sydney. Whilst these connections will remain important, safe and efficient links within and between regions is considered just as important.

How a hub and spoke network works

Currently the network is focused on connecting regions to Sydney

A hub and spoke network also provides connections between regional cities and centres

Figure 24: Hub and spoke network

---

10 Visitor Economy Industry Action Plan 2030, page 7
Providing better connections between regional cities will mean more options for visitors to access destinations across the state. This has the potential to grow the number of visitors spending more time experiencing more of what NSW has to offer.

Better connections using this hub and spoke approach means integrating long distance and short distance travel through timetabling and exploring the use of technology for more flexible on demand services for peak periods and events in regional areas. This could include same day return services to regional centres and broader regional tourism destinations.

**Improving Regional Roads**

**The road network is the main way people visit regional destinations**

The facilities along, and quality of, regional roads affect the visitor experience of travelling to regional destinations. Recent upgrades to the Pacific Highway have seen a significant increase in visitor numbers along the corridor.

New corridor strategies, regional road upgrades and improved signage to visitor destinations can further enhance the visitor experience, drive more visitors to local destinations and benefit local business.

Future mobility on our regional roads will be automated, connected, electric and shared. NSW’s future tourism vision embraces the opportunities possible with technological changes. These are rapidly transforming transport and customer experience, including the transition to automated, connected and electric vehicles, as well as new forms of shared mobility services, such as ride sharing, automated shuttles and on-demand transport services, providing convenient, comfortable and affordable mobility.
Electric vehicles are coming fast

A range of studies show that electric vehicle ownership rates are starting to increase significantly, due to cost reductions and advances in battery technology\(^\text{11,12}\). Public charging points are critical for electric vehicle owners and hirers to be able to access all parts of the state and be confident in the regional touring market. In order to support the growing number of visitors driving electric vehicles, regions and tourist operators will need to plan for the provision of charging stations, particularly along major tourist routes.

Queensland’s **Electric Vehicle Strategy** (2017)\(^\text{13}\) notes the impacts of Electric Vehicles on its regional touring market and has committed to providing public charging points along its Electric Super Highway linking tourism destinations: “There is an inherent risk that if Queensland does not support the rollout of charging infrastructure, as interstate and SEQ motorists transition to EVs, they may choose not to travel to Queensland” (page 30).

In NSW, the importance of giving regions access to the growing market of visitors driving electric vehicles cannot be overstated. This will require planning and possible industry-government co-investment to establish charging infrastructure. In particular, fast public charging infrastructure is principally required to facilitate inter-city travel for trips greater than 150-250 km.

---

**Tourist signposting**

Self-guided drives and caravanning are the major way people visit regional destinations across NSW. Tourist drives showcase local destinations across NSW. They are a partnership with local councils, Roads and Maritime Services and Destination NSW. Signposting for regional tourist drives from the State road network has been progressively installed since 1991. Maintaining these drives has been the responsibility of councils. An audit of all drives currently signposted found that many of the tourist drive signs have been removed and not replaced.

A new approach is needed. The Visitor Economy Industry Action Plan 2030 commits to a NSW Tourist Drives Strategy. The strategy will be jointly prepared by Roads and Maritime Services and Destination NSW and will consider a new partnership approach with councils to establish better mechanisms for ongoing maintenance of the signposting.

\(^{13}\) The Future is Electric, Queensland’s Electric Vehicle Strategy, 2017
Trial of signage to promote bypassed towns

The NSW Government is trialling new signage on regional highways and motorways to encourage travellers to stop and visit bypassed towns in rural and regional NSW. The signs are a first for NSW and feature colour images which best depict the features of the bypassed towns. The purpose of the trial is to ascertain if bypassed town visitation can be maintained through innovative and purpose designed signage.

Roads and Maritime Services in consultation with Destination NSW has chosen Berry off the Princes Highway, Holbrook off the Hume Highway and Macksville off the new Pacific Highway to be involved in the pilot program. The program involves installing new signs on the Princes, Hume and Pacific Highways to alert drivers to the three bypassed towns and encourage them to stop and support the community. These three locations have been chosen as they represent towns that have been bypassed for some time (Holbrook), bypassed in the last six months (Berry) or recently bypassed (Macksville). Bypassed towns signs for Macksville were installed to coincide with the opening of the Macksville bypass to traffic. The signs for Berry were installed in early 2018 and the Holbrook signs were in time for the 2018 Easter holidays.

Roads and Maritime Services and Destination NSW will evaluate the effectiveness of the signs. If the trial signs are shown to be successful, we will consider rolling the initiative out more widely across the state.
Regional trains and coaches

Our regional trains and coaches enable visitors to reach most parts of NSW from small towns to regional centres. The next 10 years will see significant improvements to public transport services for visitors right across the State.

New regional trains provide an opportunity to increase services to regional destinations. Improvements to timetabling will give visitors better options to arrive at destinations during the day. We will:

› Refocus the regional transport network to link towns with regional cities rather than being Sydney-focused
› Investigate providing faster train services to the Central Coast, Newcastle, Canberra and Wollongong
› Investigate reducing regional train journey times
› Investigate convenient public transport arrival and departure times
› Provide day return services to regional cities and centres.

Regional Air

Aviation will continue to be important in connecting people with visitor destinations in regional NSW. The interstate air routes that connect people with the holiday destinations of Ballina, Coffs Harbour and Port Macquarie are currently some of the busiest on the NSW air network. The establishment of a 24 hour international airport in Western Sydney will enhance access to regional NSW locations.

Our vision is for regional air passenger services to be part of an integrated and seamless journey for people living in, and also visiting regional NSW. Our immediate focus will be the development of the hub and spoke model for all regional transport modes through Regional Transport Plans and Place Plans. Regional aviation plays a role in this model by providing long distance connections between hubs for locals and visitors alike. We are committed to connecting public transport services with regional airports and considering timetabling, marketing and ticketing together as a holistic product in the next ten years.
Regional aviation links
Regional NSW connections (within NSW)

Figure 26: Regional NSW Intrastate Aviation Connections (February 2018)
Regional airports project funding
Regional Tourism Infrastructure Fund - $35 million Stage 1 funding

We’re investing in the future of regional aviation now!

- Regional air services play an essential foundation role in the economic development of regional cities, centres and towns. In recognition, the NSW Government has committed $70 million to a regional airports upgrade program through 27 projects at 22 regional airports to boost regional airport capacity and safety and increase their ability to attract visitors to regional NSW.

- The projects include passenger terminal upgrades, improved lighting to support airport expansion, and expanding runways and aircraft parking to accommodate larger planes.

- More than $9 million worth of projects have already been delivered including an extended runway apron area and upgrade terminal facilities in Coffs Harbour, completed in December 2017. Ballina airport has received funding from the Regional Tourism Infrastructure Fund for an expansion in recognition of its growing importance as an entry point to the North Coast region, with passenger numbers at over 510,000 per annum. The remaining projects are in various stages of design and construction with final completion of all projects currently forecast as being completed by 2019.

- The NSW Government will continue to consider investment proposals in multi-use regional aviation infrastructure on a case by case basis through the $1.3 billion Regional Growth Funds announced in the 2017/18 budget. All proposals are required to be consistent with recently developed Regional Economic Development Strategies and assessed on merit against clear criteria to demonstrate benefit for regional NSW.
Improving links to national parks, historic, artistic and cultural sites and events

Nature based tourism is a large and growing sector and is a major reason for travel to regional NSW. Many visitor attractions across the State are places of heritage value. Cultural and artistic sites and events are attracting more visitors each year. The NSW Government is exploring opportunities to improve nature-based, cultural and heritage tourism, particularly in regional NSW.

National parks cover nine per cent of NSW and generate more than $11 billion per year in expenditure, enabling hundreds of small to medium businesses to operate across the state. Over the past two years, national parks have seen a 30 per cent increase in visitation.

National parks in the Sydney basin provide valuable open space and recreational opportunities for a growing number of residents and visitors. Transport infrastructure and services are needed to accommodate this growth.

Regional NSW national parks have seen significant growth in visitor numbers where transport has been improved. For example, upgrades to the Pacific Highway corridor have contributed to a 70 per cent increase in visitation in the North Coast region.

Improved visitor access to national parks, historic, artistic and cultural sites and events could enable the further growth of nature-based, cultural and heritage tourism.
Supporting tourism to Jenolan Caves

One of the most significant historical locations in NSW is the World Heritage listed Jenolan Caves in Oberon. Established as a conservation area in the early 1800s, the Jenolan Caves now attract over 230,000 visitors annually.

In 2018, the NSW Government announced an $8.5 million upgrade to this long established, world-class visitor destination. This will include improvements to the visitors’ centre, and upgrades to paths and the creation of longer walking tracks to encourage visitors to extend their stay.

The improvements include a walkway and a viewing platform to be built near the famous Blue Lake, coloured by water flowing from the caves, to protect a platypus family.

Once the new facilities are complete, it is estimated there will be an increase of 160,000 day visitors to the caves each year. The new facilities and walking trail will also encourage more overnight visitors to the Blue Mountains and Central West region.

The Future Transport 2056 Regional NSW Service and Infrastructure Plan sets out two initiatives in the next decade that will support access to Jenolan Caves. The first is to upgrade the corridor along the Great Western and Mitchell Highways between the western end of the Blue Mountains at Mount Victoria, to better connect and support the regional cities and centres of Lithgow, Bathurst and Orange. This upgrade will include safety measures identified from the Safe System design principles for corridor planning. The second initiative is to investigate better inland NSW connections.

Improving services

Boosting services to visitor destinations across NSW

On Sydney Harbour, the new Cross Harbour ferry route will link popular visitor locations from Watsons Bay to Barangaroo and Pyrmont to enable visitors to reach many of Sydney’s top attractions whilst enjoying a spectacular journey. We will continue to add more public transport services to popular areas in Greater Sydney to make it easier and more convenient for visitors to enjoy them.

More Trains, More Services across greater Sydney

The NSW Government will invest more than $1.5 billion over the next three years on the More Trains, More Services program which will boost capacity through hundreds of extra services, better infrastructure and new trains for Sydney.

We are adding more than 750 new train services to our weekend timetable, bringing Sydney more in line with public transport offerings in other global cities during off peak times.

Already there are more than 4,000 additional seats on Blue Mountains trains every weekend with a doubling of capacity on six weekend Blue Mountains services from four to eight carriages. An additional 24 new express services between Sydney and the Blue Mountains are planned on weekends. Dedicated eight-car express tourist trains will cut travel times by around 20 minutes.
Supporting the late night economy

The visitor economy operates all day, every day. Opportunities to connect visitors to a wide range of experiences, whether on short or long stays, requires transport services to be available for both visitors and tourist businesses alike. For example, the Western Sydney Airport will offer 24/7 operations and will need to be serviced by efficient transport links for both employees at the airport and co-located businesses as well as travellers. Similarly, cruise ships can berth out of hours and frequently have short stopovers. Visitors expect to access retail and leisure activities with minimal travelling time.

Public transport enables visitors to enjoy our nightlife and special events by letting someone else do the driving.

The NSW Government is committed to growing a vibrant, safe and strong night-time economy for residents and visitors to Sydney, Newcastle and other large regional cities. We will enhance our night bus network adding new routes and services especially on Friday and Saturday nights. We will enable 24/7 public transport access to Sydney Airport with two overnight bus routes. We will provide more frequent public transport services to major events. Late night bus services will be integrated with point to point services to provide ‘last mile’ travel.

Customer Outcome 3: Making transport the attraction

Transport not only gets visitors to destinations, but can also be an attraction in itself.

Visitors consider riding a ferry or bicycle as some of the top activities to do while in NSW to experience the place they are travelling in. There are opportunities to use technology to create interactive experiences that highlight and provide information about destinations along transport routes.

Creating places with our transport assets

The NSW Transport cluster of agencies holds many assets that have potential to improve the visitor destination experience and better support the visitor economy.

Interchange upgrades across the state are providing better experiences for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure.

Transport for NSW is also unlocking underutilised assets for use by the Tourism sector. Ferry wharves in Sydney Harbour are now open to tourism operators and investigations are underway to open up other assets across the transport network.

Recent public transport interchange upgrades have incorporated public art into the design. For example, the WynScreen artistic innovation delivered as a part of the Wynyard Walk project which has created a new artistic destination in the heart of Sydney.

</tbody>
</table>
Central Station

Central Station is a key transport hub in the NSW transport network. Over the next decade, it will have an even greater role with CBD and South East Light Rail and Sydney Metro connecting with existing suburban and intercity trains, coaches, buses and the Inner West Light Rail.

The NSW Government is developing a vision and plan for the Central Station precinct, focusing on improving the interchange experience for our customers and better integrating Central with surrounding recreational, business, residential and educational areas.

In 2018, construction will start on Central Walk, a 19-metre wide tunnel from Chalmers Street, linking the new metro platforms under Central. This is the start of Central’s renewal, bringing new entrances and simpler interchanges to make life easier for customers.

Further development ideas are being considered as part of the strategic framework for the wider Central Precinct. This framework will investigate opportunities and constraints following consultation with our customers and the community undertaken in 2017. In addition to providing a high quality interchange experience, our focus will be on creating quality urban design, providing new retail and other commercial services, respecting heritage and making Central Station a great place.
Growing transport as tourism

Great rail journeys

Our railways are increasingly popular as visitor experiences in their own right. Transport for NSW provides funding to Transport Heritage NSW to run heritage rail tours and to support other operators in the sector.

Overnight sleeper services have become an iconic way to explore the country. The Indian Pacific train provides a sleeper service between Sydney and Perth, operating from Sydney’s Central Station and passing some of the most scenic countryside in NSW. The new regional rail fleet will bring strong potential to grow this market within NSW.

The Byron Bay Railroad Company operates the world’s first solar powered train on the disused railway line between Byron Bay CBD and North Byron.
Regional bicycle tourism

NSW has a vast 3,100 kilometres of non-operational rail lines that can be redeveloped with innovative initiatives to produce social and economic benefits for regional NSW.

In regional NSW, disused rail corridors are being considered for conversion into rail trails where there are viable positive outcomes and strong community support.

The first rail trail will run from Tumbarumba to Rosewood, in the picturesque Snowy Valleys Way, an already popular tourism destination.

Conversion of the 22-kilometre disused rail track, into a sealed and smooth bitumen path, will be ideal for a variety of recreational pursuits, suitable for all ages and abilities, while helping to preserve the natural environment and local heritage, and supporting local communities.

More than 300 local walking and cycling projects are delivered in partnership with councils across NSW each year including the Cycling Towns Program which is completing cycling networks in regional towns and providing cycleway signage to benefit visitors and residents. Recent cycling towns include Forster-Tuncurry and Orange.
Rail trails

Rail trails unlock scenic public land in regional areas offering visitors and local residents a safe option to walk, cycle, jog or use other non-motorised forms of transport such as horse riding. The economic benefit of rail trails includes the creation of jobs in local communities and other economic benefits for local businesses associated with tourism such as increase expenditure on accommodation, food and participation in regional events.

In June 2015, the NSW Government announced $4.9 million funding for the Rosewood to Tumbarumba Rail Trail pilot project. The proponent demonstrated effective community consultation, a viable operating model and the ability to generate economic benefits.

In June 2017, the NSW Government passed the Transport Administration Amendment (Closure of Railway Line between Rosewood and Tumbarumba) Act 2017, which has allowed the development of the Rosewood to Tumbarumba rail trail.

This pilot rail trail project is providing the opportunity to both identify the full range of tourism and recreational opportunities presented by rail trails and also clarify and address issues such as biosecurity and privacy related to the establishment of rail trails on disused rail corridors in NSW.

The NSW Government retains ownership of the public land associated with rail trail development, therefore preserving the rail corridor for re-opening in the future should it be required.
Boating

With so many beautiful and diverse harbours, estuaries, inlets and lakes dotted along the coast, NSW has the potential to be a prime destination for boating based holidays.

In many coastal, riverside and lakeside communities, particularly in regional areas, boating is an important driver of tourism growth, with visitors attracted to a range of recreational activities on the water in NSW including boating, fishing and yachting. There are 25 regional coastal ports and over 700 boat ramps in NSW.

As of 30 June 2017, there were nearly 240,000 recreationally registered vessels and 10,000 commercial vessels in NSW. Recreational and commercial activities on our waterways contribute an estimated $2.7 billion to the state economy and employ an estimated 8,000 people.

This includes a range of commercial hospitality, tourism and charter boat operators who supply many of the experiences that NSW waterways have to offer, such as fishing and dive charters, whale and dolphin watching, bare boat charters and hire and drive.

This maritime industry – alongside other recreational and commercial users of NSW waterways – is supported by significant NSW Government maritime infrastructure investment, which supports the NSW visitor economy and the revitalisation of foreshores that will encourage further growth of tourism.

A large proportion of ferry customers are also visitors, with 15 million ferry journeys in NSW each year, servicing tourism hubs such as Circular Quay, Darling Harbour and Manly.
Boating related tourism activity is an important part of the NSW visitor economy, particularly in regional areas throughout the State. Every year tens of thousands of keen boaters tow their vessel up or down the coast for a weekend or week away to go fishing or just to enjoy many of the State’s coastal and inland waterways. Other boaters sail or cruise along the NSW coast to visit another waterway within a day’s sail. Non-boating tourists are also attracted to our magnificent waterways and often include a day out on the water as part of their travels, whether on a ferry at Port Stephens, a whale watching charter vessel from Eden or a fishing charter from Coffs Harbour.

To provide safe access to the State’s waterways, and thereby support all forms of boating related tourism, the NSW Government makes a significant investment in boat ramp upgrades, new and upgraded wharves and jetties, boat harbours, dredging, or through investment and maintenance of breakwaters and river training walls to provide protection from the ocean at key entrance points. Much of this foreshore infrastructure, such as the boat harbours and wharves, provides a focal point for all communities to gather and socialise and for development of hospitality and tourism services which also make a significant contribution to local communities, particularly in regional towns.

Customer Outcome 4: A seamless experience

Our collaboration and partnerships with transport service providers, tourism operators, across Government and with local councils all work to create a seamless experience for visitors.

Packaging experiences

New service models will enable transport service providers to package their services with destination experiences.

Mobility as a Service

Transport for NSW will investigate ways to support the emergence of Mobility as a Service (MaaS) models that can be tailored to the needs of visitor groups or individuals. MaaS is a service model that enables customers to plan and pay for their journeys using a range of services via a single customer interface. It has the potential to enable customers to access integrated, easy-to-understand journeys in a broad market of transport services. In a fully operational service model, the MaaS provider would sell seamless multimodal journeys, offer convenient payment methods such as subscription services, and communicate directly with customers.

Figure 36: Example of the Mobility as a Service (MaaS) concept
Source: Telematics Wire, 10 February 2016 http://telematicswire.net/mobility-as-a-service-maas-launches-first-on-demand-mobility-service-in-finland/
These transport options could include not just public transport but point to point services (for example taxi, ride share and bicycle share) and can be bundled with other visitor experiences, like events. Access to this technology will be enabled in more locations in regional NSW through the NSW Government’s partnership with the Australian Government and mobile phone carriers to eliminate up to 795 mobile black spots across the State\textsuperscript{14}.

**Servicing events, festivals and peak holiday times**

Events, festivals and peak holiday periods bring many visitors to NSW and improve the performance of the tourism industry for the benefit of the wider community.

Getting visitors to their destinations presents transport and coordination challenges. Transport for NSW coordinates with Destination NSW and event managers to facilitate access to upcoming events and provide regional event support. This includes organising additional public transport services during major events like Vivid Sydney and special services to get to regional events like the annual Elvis Express train to the Parkes Elvis Festival and the Broken Heel Festival.

The Transport Management Centre has responsibility for safely managing travel to major events. Its role is to:

- ensure the safe separation of event patrons, participants and volunteers from traffic
- manage the reduced capacity of the road system
- minimise the traffic impact on the non-event community and the emergency services, and
- minimise costs.

We recognise there is more we can do to better coordinate for events, festivals and peak holiday periods and welcome feedback on how we could do this.

---

**Figure 37: Vivid Sydney trip planner**
Event Signage

Transport for NSW has developed a system of pink signage to support visitors to use public transport between major events.

The pink signage system is designed as a temporary response to assist customers navigating the transport network when changes to their journey occur due to a major event or major transport disruption.
Integrating tourism into transport planning

Delivering and coordinating with partners in the tourism and transport industries, local government and NSW Government agencies is needed to ensure a seamless experience for visitors and further grow the visitor economy.

Creating attractive and vibrant places that are well connected to the transport network will also help boost tourism. A recent example is the plan to upgrade Circular Quay where a decision was made to leverage Government investment to unlock private capital. This will allow a whole-of-precinct renewal that includes retail, dining and entertainment attractions as well as a modern transport interchange.

It is important that tourism needs are incorporated into transport planning as visitors are not accustomed to our transport facilities. This ensures services will be easier to use. Tourism and special events are considered in the design and operation of new infrastructure such as the CBD and South East Light Rail Project. Planning for the renewal of Circular Quay will incorporate heritage values and tourism needs. We will keep Sydney open for business during construction of transport infrastructure by planning, wayfinding and working with businesses and tourism operators. We will improve access to regional train stations with coaches, local buses and point to point services.

Figure 39: Artist impression of a possible outcome of the Circular Quay wharf and precinct renewal program for investigation

Collaboration and partnerships

The Future Transport Strategy and Plans introduce new ways of problem solving that fit within our vision-led approach to planning. One of the key differences in this new approach, compared with more traditional methods, is that the NSW Government sets a vision and outcomes across several agencies even before we start identifying problems. This gives us a clear picture about the outcomes we want for our customers and the community and lets us identify obstacles to realising these outcomes.

A key feature of this approach is co-design – a high level of collaboration and decision making.

From the first stages of planning we will engage all levels of government, customers and industry, to test our understanding of problems and harness their innovation to develop the best possible solutions.

In developing solutions, we are also using a new approach based on intensively testing problems from a customer perspective - understanding what drives their preferences, and impacts their travel experiences.

Co-design and collaborative problem solving

To deliver future transport outcomes and adapt to changing needs, we need to find new ways of working, continuously innovate, and involve everyone that benefits from, or is impacted by, transport and land use planning decisions.
We will build new collaborative partnerships with customers, the community and industry as we continue to improve the way we deliver the infrastructure and services to support the visitor economy.

Destination Networks

In 2016, Destination NSW established six Destination Networks across NSW. These Destination Networks facilitate visitor economy growth at the local level, through representing and co-ordinating the region’s tourism industry. Each Destination Network has a Destination Management Plan which includes initiatives that the NSW Transport cluster of agencies can support.

![NSW Destination Networks](image-url)

**Key**
- Riverina Murray NSW
- Southern NSW
- North Coast NSW
- Country and Outback NSW
- Sydney Surrounds North
- Sydney Surrounds South

*Figure 41: NSW Destination Networks*
**Destination North Coast**

The NSW North Coast is the third biggest tourism region in Australia and comprises the coastal centres east of the Great Dividing Range from Tweed Heads to Hawks Nest. In the year ending June 2017, there were 19.9 million domestic and 3.6 million international overnight stays in the region.

The *North Coast Destination Management Plan* identifies seven experience platforms to drive and coordinate tourism product experience development across the North Coast over the next four years. Nature experiences differentiate the North Coast from other coastal regions and are the key focus of the Destination Management Plan. The seven experience platforms for the North Coast are:

1. Nature experiences
2. Caravan and Camping
3. Food and Local Produce
4. Arts, Heritage and Aboriginal Tourism
5. Events
6. Health, Wellbeing and Alternative Lifestyles

A key transport priority for the North Coast is the need for critical road infrastructure and improved signage to better facilitate these experiences. The NSW Transport cluster also has a role to play in working with Destination North Coast and other agencies to encourage regional dispersal – including the development of trails and touring routes. The North Coast Destination Network intends to develop a Bike Tourism Strategy for the North Coast.

**Destination Country and Outback**

The Destination Network Country and Outback is a diverse area that covers 61.2 per cent of NSW. It comprises Outback NSW, New England and North West, Greater Western Plains and Country NSW. In 2017 overnight visitor expenditure within the Country and Outback Destination Network area totalled $2.6 billion, with a compounding annual rate of growth of four percent since 2008.

The *Country and Outback Destination Management Plan* takes a strategic approach to maintaining existing tourism markets while also targeting new higher-value markets. The Plan identifies seven strategic themes which highlight the points of difference of the region compared with other destinations and provide a high-level experience framework:

1. Celebrating Culture on Country
2. Wine-lovers and Foodie Finds
3. Unlimited Horizons
4. Exploring our Nature
5. Revealing our Heritage
6. Little Places, Big Stories
7. Events and Conferences.
The NSW Transport cluster can help to enable local level initiatives that will underpin these themes through:

- The infrastructure and road signage to develop experientially-led touring routes and signage and facilitating travel
- Promotion and access to events, festivals and destinations in the region.

**Destination Southern NSW**

Destination Southern NSW stretches from the South Coast of NSW to the Snowy Monaro and across to the Canberra Region Tablelands. Total income from tourism across the region is almost $1.6 billion per year supporting 2,630 tourism businesses. There is growing interest in cycling, adventure and nature based activities in the region as well as self-drive holidays.

The *Southern NSW Destination Management Plan* identifies five game-changer projects that will lead to growing the visitor economy for the region:

1. Savour the Southern activation
2. Regional approach to Drive Tourism and cross-regional linking products
3. Experience and product development
4. Building destination appeal supported by itineraries and product clusters
5. Support for events.

Transport has a key role to play in enabling these projects through improving visitor access and flows through the region by improving connectivity in road infrastructure and enabling the development of three rail trails identified in the Destination Management Plan.

**Destination Riverina Murray**

The Riverina Murray Destination network comprises the Snowy Valleys, Albury-Hume, Riverina regional centres and the food bowls of Griffith and Wagga Wagga, Central Murray towns of Cowra, Echuca and Deniliquin and the outback Riverina with strong cross-border connections. In 2017 the Riverina Murray region attracted 5.3 million visitors. Daytrip visitors comprised 55 percent of visitors to the region (2.9 million) and overnight visitors comprised 45 percent (2.3 million). The Riverina Murray Destination Management Plan projects a growth to 8.6 million visitor nights in the region by 2031.

The *Riverina Murray Destination Management Plan* identifies nine overarching strategic development themes to harness the tourism opportunities of the region:

1. Major Centre Development
2. Nature-Based Tourism
3. Rivers and waterways
4. Food and Agritourism
5. Major touring routes
6. Sport and Recreation
7. Festivals and Events
8. Accommodation
9. Infrastructure and Servicing.
The NSW Transport cluster has a role to play in supporting these directions through place-making, boating infrastructure, servicing events and festivals and highway upgrades and signage to support rationalised touring routes for targeted investment and promotion. The Destination Management Plan looks to establish the Snowy Valleys as the rail trail region of NSW and identifies five rail trails for ongoing support including the Tumbarumba to Rosewood Pilot Rail Trail currently under development.

**Destination Sydney Surrounds North**

Destination Sydney Surrounds North includes the Blue Mountains, Hawkesbury, Central Coast and Hunter regions. In 2017 the area generated $4.07 billion in visitor expenditure equating to 12.3 percent of the NSW visitor economy.

The *Sydney Surrounds North Destination Management Plan* identifies seven strategic priorities:

1. Advocate for the local Visitor Economy and foster greater collaboration between regions within the area
2. Facilitate destination infrastructure development
3. Facilitate product and experience development
4. Facilitate major events and conference growth
5. Maximise the benefits of regional tourism funding programs
6. Facilitate industry skills development and knowledge
7. Improve destination marketing effectiveness.

The NSW Transport cluster can help achieve these priorities through:

- Improved public transport connections
- Place-making enhancements on main streets to contribute to revitalisation of destination
- Improved road connections through mountains to provide better connections to nature based activities
- Improvements to cycle paths to enable food and wine, nature and soft adventure activities (particularly in the Hunter).

**Destination Sydney Surrounds South**

Destination Sydney Surrounds South comprises the Illawarra, Wollondilly, Southern Highlands and Shoalhaven. In 2017 $1.77 billion was injected by overnight visitors into the local economy with an average annual growth rate of four percent since 2013.

The *Sydney and Surrounds South Destination Management Plan* establishes six strategic imperatives:

1. Cohesive Destination Management
2. Destination Infrastructure
3. Collaborative Destination Marketing
4. Product and Experience Development
5. Events and Conferencing
The NSW Transport cluster can help achieve these priorities through:

› Improved public transport and road connections from Sydney
› Assistance with the development of cycleway infrastructure including the planned Mittagong to Moss Vale cycleway
› Progressing improved rail connections from South West Sydney.

Local councils

Councils across NSW work with local tourism operators to develop better products and experiences for visitors to their regions. Transport for NSW has partnered with councils to develop local transport services, policy, signage and information. Tourism road signage across NSW is a collaborative effort between Roads and Maritime Services, Destination NSW and councils.

The Transport cluster will continue to work to strengthen collaboration with councils across NSW.
Honouring Aboriginal connection to the land

In looking four decades ahead, Future Transport 2056 acknowledges the more than 40,000 years of continuous Aboriginal connection to the land that has brought NSW to where it is today. Future Transport 2056 supports OCHRE (Opportunity, Choice, Healing, Responsibility and Empowerment), the NSW Government’s plan to improve outcomes for Aboriginal peoples. Future Transport 2056 also acknowledges the special role to be played by the transport sector in strengthening Aboriginal communities. By forging partnerships with Aboriginal communities, new initiatives can be identified that will bring more Aboriginal people into the business of tourism and transport and share in the economic and other benefits of the State’s growth.

Diversifying transport options to expand tourism in the Snowy Mountains and South Coast

Snowy-Monaro Regional Council (SMRC) is a newly formed Council that covers a large area in the strategic corridor between Canberra-Queanbeyan and the NSW South Coast. Within this region is one of Australia’s marquee tourism destinations: the Snowy Mountains. The region attracts 1.2 million visitors annually with the vast majority relying on private vehicle trips. In the winter months the influx of visitors can cause major traffic delays and the council is investigating and implementing strategies to increase non-winter tourism in the region to make the Snowy Mountains a year round destination.

NSW Train Link operates regional coach services connecting people to key locations around the region including Jindabyne, Cooma, Tumut, Tumbarumba, Berridale, Dalgety and Bombala. Connections in the region between Canberra Airport and the Port of Eden to major visitor destinations will support growth of the visitor economy in the region.

Transport for NSW will continue to work together with council to investigate new options for transport to safely accommodate growing visitor numbers within the region throughout the year.

Honouring Aboriginal connection to the land

In looking four decades ahead, Future Transport 2056 acknowledges the more than 40,000 years of continuous Aboriginal connection to the land that has brought NSW to where it is today. Future Transport 2056 supports OCHRE (Opportunity, Choice, Healing, Responsibility and Empowerment), the NSW Government’s plan to improve outcomes for Aboriginal peoples. Future Transport 2056 also acknowledges the special role to be played by the transport sector in strengthening Aboriginal communities. By forging partnerships with Aboriginal communities, new initiatives can be identified that will bring more Aboriginal people into the business of tourism and transport and share in the economic and other benefits of the State’s growth.
CHAPTER 4

Next Steps
We will use the *Tourism and Transport Plan* to progress detailed planning for specific initiatives, consider funding and delivery options and track our performance in delivering on the customer outcomes. We will continue to engage with our customers, the community and stakeholders to ensure our plans are meeting the needs of customers and being responsive to new challenges and opportunities.

**Continuing to engage with our customers**

The *Tourism and Transport Plan* is a ‘living’ plan that will continue to be updated as technology evolves and new opportunities emerge. An agile and flexible approach is the hallmark of our approach to planning in Future Transport 2056.

This means we will continue to engage closely with our customers, the community and stakeholders, including federal departments, state departments and agencies, local councils and industry. This will be important for ensuring that customer, community and stakeholder insights inform more detailed planning and that this planning is integrated across government and with industry. This will mean that the initiatives identified in the *Tourism and Transport Plan* will continue to reflect existing plans and work that is currently being undertaken by key stakeholders such as local councils.

We will work with the Department of Industry, Infrastructure NSW and Destination NSW as the NSW Government finalises and implements a statewide Tourism Infrastructure Strategy, Cruise Development Plan, and Destination Management Plan.

In consultation on the draft Plan, our customers told us that they want more input into the planning of transport infrastructure and services. By closely engaging with our customers as we update the Plan and progress detailed planning, we will be responsive to this feedback.

**Progressing our plans**

Establishing customer outcomes and a vision for our transport system, and identifying and prioritising initiatives to deliver on these is just the first step in planning for the future. To ensure we are delivering the best outcomes for customers and the community, we will undertake detailed planning and feasibility studies for specific initiatives as part of the business case process. This will ensure initiatives are progressed for funding and deliver value for money for the people of NSW.
## Glossary

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accessibility</td>
<td>The ability for everyone, regardless of disability, personal circumstances or where they live, to use and benefit from the transport system.</td>
</tr>
<tr>
<td>Active transport</td>
<td>Transport that is human-powered, such as walking or cycling.</td>
</tr>
<tr>
<td>Car share</td>
<td>A model of car rental, with the ability to rent a car for a short period of time, often by the hour.</td>
</tr>
<tr>
<td>Catchment</td>
<td>The area from which a location or service attracts people.</td>
</tr>
<tr>
<td>Committed initiatives (0-10 years)</td>
<td>Projects, service changes or policies that either have committed funding, are committed/contractually committed, are for immediate detailed planning, or are part of key maintenance, renewal or safety programs. Some committed initiatives are subject to final business cases and funding.</td>
</tr>
<tr>
<td>Contactless payment</td>
<td>Method of purchasing goods or services using RFID technology or near-field communication.</td>
</tr>
<tr>
<td>Corridor</td>
<td>A broad, linear geographic area between places.</td>
</tr>
<tr>
<td>Customer</td>
<td>Everyone who uses transport services or infrastructure is a customer of the NSW transport system. Whenever a person drives, travels by train, bus or light rail, or walks or cycles they become a customer of the transport system. Our customers also use our transport networks for business purposes, to deliver goods and services, and to move freight across the State and beyond.</td>
</tr>
<tr>
<td>Customer outcomes</td>
<td>The economic, social and environmental benefits which customers can expect from the transport system and are used by planners to guide investment, policy and reform and service provision.</td>
</tr>
<tr>
<td>Demand responsive transport services (or on-demand)</td>
<td>Transport services that are responsive to the demands of individual customers, rather than a fixed timetable or route. They can provide new or improved coverage to areas where traditional public transport is difficult to provide. They may act as feeder services to stronger public transport corridors.</td>
</tr>
<tr>
<td>Destination Management Plan</td>
<td>A business plan for building and managing the visitor economy for a destination.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>------</td>
<td>------------</td>
</tr>
<tr>
<td><strong>Destination NSW</strong></td>
<td>Lead government agency for the NSW tourism and major events sectors.</td>
</tr>
<tr>
<td><strong>Drone</strong></td>
<td>An unmanned aerial vehicle (UAV) which may be remotely controlled or can fly autonomously.</td>
</tr>
<tr>
<td><strong>Fleet</strong></td>
<td>The collective vehicles of a transport company or service.</td>
</tr>
<tr>
<td><strong>Flexible (or demand responsive) transport</strong></td>
<td>Transport services that are run based on the demands of individual customers, rather than a fixed timetable or route.</td>
</tr>
<tr>
<td><strong>Freight</strong></td>
<td>Goods or cargo transported by truck, light commercial vehicles (e.g. vans and utes), cycle couriers, rail, aircraft or ship.</td>
</tr>
<tr>
<td><strong>Future Transport Strategy</strong></td>
<td>Sets the 40 year vision, directions and outcomes framework for customer mobility in NSW, which will guide transport investment over the longer term.</td>
</tr>
<tr>
<td><strong>Global gateway cities</strong></td>
<td>Cities that provide state level services and facilities to support a broad population catchment while also having international connections through their airport and/or port. Canberra, Greater Sydney, Greater Newcastle and Gold Coast are global gateway cities that support NSW.</td>
</tr>
<tr>
<td><strong>Greater Newcastle</strong></td>
<td>The area comprising five local government areas of Cessnock, Lake Macquarie, Maitland, Newcastle and Port Stephens.</td>
</tr>
<tr>
<td><strong>Greater Sydney</strong></td>
<td>The 33 local government areas of Bayside, Blacktown, Blue Mountains, Burwood, Camden, Campbelltown, Canada Bay, Canterbury-Bankstown, Cumberland, Fairfield, Georges River, Hawkesbury, Hornsby, Hunters Hill, Inner West, Ku-ring-gai, Lane Cove, Liverpool, Mosman, Northern Beaches, North Sydney, Parramatta, Penrith, Randwick, Ryde, Strathfield, Sutherland, The City of Sydney, The Hills, Waverley, Willoughby, Wollondilly and Woollahra.</td>
</tr>
<tr>
<td><strong>Greater Sydney Commission (GSC)</strong></td>
<td>An independent organisation funded by the NSW Government, responsible for coordinating and aligning the planning that will shape the future of Greater Sydney.</td>
</tr>
<tr>
<td><strong>Greater Sydney Services and Infrastructure Plan</strong></td>
<td>A supporting plan in the Future Transport 2056 suite of plans. It sets the customer outcomes for Greater Sydney for the movement of people and freight to meet customer needs and deliver responsive, innovative services.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-----------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Hub and Spoke Model</strong></td>
<td>A transport network model that provides connections (spokes) to and from key centres (hubs). The spokes link to different hubs across an area, rather than focussing on one key hub. It provides regional trunk public transport services that connect to key centres which are supported by a network of intra-regional transport services that connect to smaller towns and villages. It aims to provide more convenient public transport arrival and departure times, including day return services to regional cities and centres.</td>
</tr>
<tr>
<td><strong>Infrastructure NSW (iNSW)</strong></td>
<td>An independent statutory agency responsible for assisting the NSW Government with identifying and prioritising the delivery of critical public infrastructure for NSW.</td>
</tr>
<tr>
<td><strong>Initiatives for investigation (0-10 years)</strong></td>
<td>Initiatives intended to be investigated for potential commitment or implementation within the next 10 years. These will be prioritised for more detailed investigation to determine if they are required in the next decade. They are prioritised based on their expected benefits or strategic importance. Initiatives proposed for investigation are unconstrained by affordability and will be subject to funding and strategic business cases that consider a range of possible solutions.</td>
</tr>
<tr>
<td><strong>Interchange</strong></td>
<td>A facility to transfer from one mode of transport, or one transport service, to another. For example, major rail station, bus facility or park and ride.</td>
</tr>
<tr>
<td><strong>Light rail</strong></td>
<td>An urban railway transportation system using vehicles that are capable of sharing streets with vehicular traffic and pedestrians, but may also be operating on an exclusive right-of-way such as a segregated rail corridor, tunnel or elevated structure.</td>
</tr>
<tr>
<td><strong>Liveability</strong></td>
<td>The term ‘liveability’ is used in land use planning to focus on the people who live in an area, the places they spend time in, their health and quality of life as well as overall community wellbeing.</td>
</tr>
<tr>
<td><strong>Mobility as a Service (MaaS)</strong></td>
<td>A business model for customers to access transport services in which customers can use a single account and booking interface to access a broad range of transport modes, none of which the customer owns. Examples would be allowing a customer to access public transport, car sharing and bike sharing all using the same system.</td>
</tr>
<tr>
<td><strong>More Trains, More Services</strong></td>
<td>The More Trains, More Services Program is a series of network-wide investments that will deliver additional capacity, reduce the complexity of rail operations and better connect the network. More Trains, More Services transforms the rail network by utilising world class technology to enable automated high capacity turn-up-and-go services. The reconfiguration of the rail network in metropolitan Sydney will lead to the separation of inner urban and intercity services with initial focus on increasing the capacity of Central Station and the transformation of the T1 Western, T4 Illawarra (including the South Coast Line) and T8 Airport lines.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>------------------------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Movement and Place Framework</td>
<td>A framework for planning, designing and operating our road network based on a ‘one road network’ approach. It considers how different parts of the network perform different functions – moving people and goods and being places for people, particularly in centres.</td>
</tr>
<tr>
<td>New Intercity Fleet</td>
<td>A new fleet of long distance, intercity trains from Sydney to the Central Coast, Newcastle, the Blue Mountains and the South Coast. As part of the delivery of the fleet, we will investigate reduced rail journey times through rail timetable improvements and the implementation of rail network optimisation strategies. This may include re-orientating rail services to provide express services between key stations and connector services between other stations.</td>
</tr>
<tr>
<td>NSW Boating Now Program</td>
<td>Program to support initiatives that enhance the boating experience in NSW, including the delivery of recreational boating infrastructure across NSW waterways.</td>
</tr>
<tr>
<td>NSW Long Term Transport Master Plan</td>
<td>NSW’s first integrated transport plan, which brought together planning for freight and passenger movements across all modes of transport. Future Transport 2056 builds upon the 2012 Long Term Transport Master Plan and the commitments it has delivered.</td>
</tr>
<tr>
<td>NSW TrainLink Discovery Pass</td>
<td>Ticket permitting unlimited booked train anywhere on the NSW TrainLink regional train and coach network.</td>
</tr>
<tr>
<td>NSW Transport cluster</td>
<td>A group of agencies consisting of Transport for NSW, the operating agencies of Roads and Maritime Services, Sydney Trains, NSW Trains, and the State Transit Authority, the state’s private transport operators, a number of project delivery offices for major transport projects, and the Port Authority of NSW.</td>
</tr>
<tr>
<td>On-demand transport</td>
<td>See definition for demand-responsive.</td>
</tr>
<tr>
<td>Precinct</td>
<td>A geographical area with boundaries determined by land use. For example, an area where there is an agglomeration of warehouses may be termed a freight precinct.</td>
</tr>
<tr>
<td>Regional Airports Program</td>
<td>Improvements to increase the efficiency, accessibility, competition, commercial viability and sustainability of regional aviation in NSW. Includes supporting connections through the provision of funding to upgrade and maintain regional airport facilities. Funding from the Regional Tourism Infrastructure Fund.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>------</td>
<td>------------</td>
</tr>
<tr>
<td>Regional NSW</td>
<td>The area of NSW outside Greater Sydney. It includes the nine regions of Central Coast, Hunter, North Coast, New England North West, Central West and Orana, Far West, Riverina Murray, South East and Tablelands and Illawarra-Shoalhaven.</td>
</tr>
<tr>
<td>Regional NSW Services and Infrastructure Plan</td>
<td>A supporting plan in the Future Transport 2056 suite of plans. It sets the customer outcomes for regional NSW for the movement of people and freight to meet customer needs and deliver responsive, innovative services.</td>
</tr>
<tr>
<td>Ride sharing</td>
<td>Business models similar to Uber and Lyft within which private citizens provide point-to-point transport services to other citizens.</td>
</tr>
<tr>
<td>Service (or transport service)</td>
<td>Service in this document refers to transport services, generally public transport services. Examples include trains, buses, light rail and ferries. Services might also include shuttle buses and a range of privately operated but publicly accessible transport types.</td>
</tr>
<tr>
<td>Slots</td>
<td>The right granted by an airport that allows an aircraft to land or depart during a specific time period.</td>
</tr>
<tr>
<td>State Infrastructure Strategy</td>
<td>The State Infrastructure Strategy, developed by Infrastructure NSW, provides the NSW Government with independent advice on the infrastructure needs of the State over the next 20 years.</td>
</tr>
<tr>
<td>Three cities of Greater Sydney</td>
<td>The three cities envisaged by the Greater Sydney Commission are the established Eastern Harbour City, the developing Central River City and emerging Western Parkland City in and around the new airport. Each of these three cities will have their own unique identity and each must be planned to maximise liveability, productivity and sustainability.</td>
</tr>
<tr>
<td>Tourism Research Australia</td>
<td>A branch within the Tourism Division of Austrade. A provider of tourism intelligence.</td>
</tr>
<tr>
<td>Trade Gateway</td>
<td>Trade gateways are locations with major ports or airports, and their surrounding precincts. They perform an essential and ongoing role to connect Sydney with locations across Australia and the world. Transport gateways are vital to Sydney’s prosperity and often support large concentrations of complementary business activity and employment.</td>
</tr>
<tr>
<td>Transport Access Program</td>
<td>The Transport Access Program (TAP) is an initiative to provide a better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure such as stations, wharves and commuter car parks.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>--------------------------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Transport cluster</td>
<td>The transport cluster is made up of an extended network of government agencies and private organisations which work to deliver transport services. Examples include Roads and Maritime Services, Sydney Trains, NSW Trains, State Transit Authority and public transport operators. Transport for NSW is the lead agency of the NSW transport cluster.</td>
</tr>
<tr>
<td>Transport disadvantage</td>
<td>Describes a result when certain factors such as language, age and cost result in causing less choice for when, where and how customers travel.</td>
</tr>
<tr>
<td>Visitor Economy Industry Action Plan 2030</td>
<td>One of six Industry Action Plans developed under NSW 2021 with targets to grow NSW’s visitor economy and benefit businesses and the community.</td>
</tr>
<tr>
<td>Walking and Cycling Programs</td>
<td>Programs to improve walking and cycling connections.</td>
</tr>
<tr>
<td>Wayfinding</td>
<td>Information systems that guide people through a physical environment.</td>
</tr>
<tr>
<td>Western Sydney Airport (WSA)</td>
<td>The designated name for the second Sydney airport, located within the suburb of Badgerys Creek.</td>
